

Plexidor Glass Installation

*Sliding Glass Patio Doors • French Doors • Stationary Windows
• Other Household Glass Wall Surfaces*

The Plexidor Glass Conversion Pet Door was developed to accommodate homeowners who want to mount a Plexidor Pet Door into glass. We have specially designed our new glass mount to simplify the installation process. The Plexidor Pet Door will fit a variety of locations including:

- ***Sliding Glass Patio Doors***

- ***French Doors***

- ***Stationary Windows***

- ***Other Household Glass Wall Surfaces***

Our installation method replaces the glass unit in your patio door or window. The existing glass panel in your door cannot be used since it is already tempered and cannot be cut.

Replacing the glass with tempered safety glass assures the door is safe and will look great in your home, year after year! The quality of the replacement glass will be similar to the existing glass; you will not have to downgrade your glass.

STEP 1

Determine the Plexidor Pet Door size required to fit your pet.

Door Size	Opening Width	Opening Height	Dog Weight	Breed Size Examples
Small	6 1/2 inches	7 1/4 inches	Dogs up to 9 lbs. Cats up to 24 lbs.	Cats, Chihuahuas, Papillons, Yorkies, Maltese, Pomeranians & Japanese Chins
Medium	9 inches	12 inches	Up to 40 lbs.	Poodles, Corgis, Dachshunds, Beagles, Pekingese, Shelties, Schnauzers, Cocker Spaniels & most Terriers
Large or Electronic	11 3/4 inches	16 inches	Up to 100 lbs.	German Shepherds, Labs, Collies, Setters, Dobermans, Boxers, Pointers & Golden Retrievers
Extra Large	16 inches	23 3/4 inches	Up to 220 lbs.	Great Danes, St. Bernards, Borzois, Old Eng. Sheepdogs, Newfoundlands, Irish Wolfhounds, Great Pyrenees

STEP 2

Choose your color – available colors:

SATIN

BRONZE

WHITE

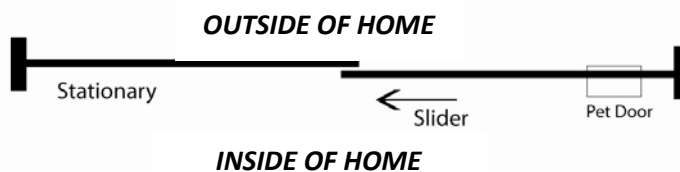

STEP 3

Determining where the Plexidor Pet Door will be installed.

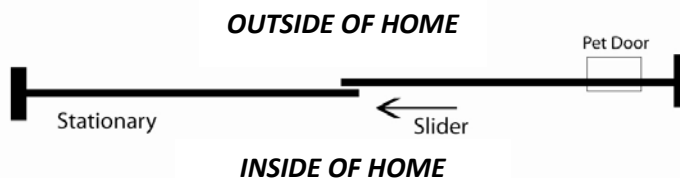

Sliding glass patio door or a window that opens and closes

Important: Correct location of the pet door is required to ensure operation of the sliding door. The following examples show 4 types of mounting locations. Simply match the drawing to your sliding door. *Note: The slider can also go from L to R with the same configurations shown below.*

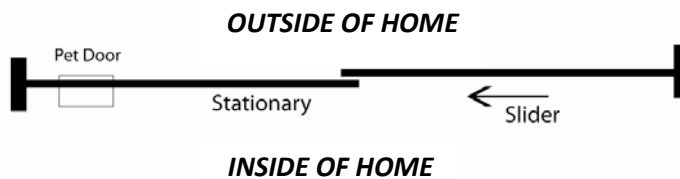

LOCATION A: Pet door mounted on the slider panel which is located on the inside of the stationary panel

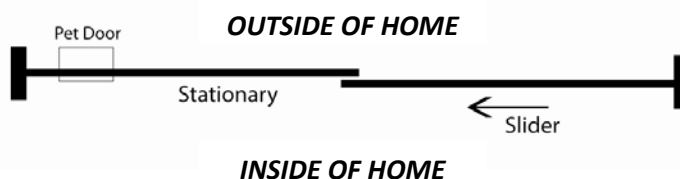

LOCATION B: Pet door mounted on the slider panel which is located on the outside of the stationary panel

LOCATION C: Pet door mounted on the stationary panel which is located on inside of the slider panel

LOCATION D: Pet door mounted on the stationary panel which is located on outside of the slider panel

STEP 4

Contact Your Local Authorized Plexidor Dealer / Installer or call 1-942-752-7021 for the dealer nearest you.

Contacting a Local Plexidor Dealer / Installer

The Authorized Plexidor Dealer / Installer will come to your home to take measurements of the glass. They will complete the paperwork and request a deposit.

The Dealer will then order the new replacement glass and Plexidor Pet Door. In approximately a week to 10 days, the Dealer will come back to your home with the replacement glass, remove your existing glass and replace it with the new tempered safety glass and the Plexidor Pet Door.

It usually takes around two weeks for the new glass and Plexidor to be installed and the job to be completed.

Your Dealer will recommend you keep the original glass, wrapped and stored somewhere safe so if you no longer require the pet door or you move, the original glass can be put back in. You can take the Plexidor Pet Door with you.

Thank you for your interest in Plexidor Performance Pet Doors!
